

## **CBOSS at Arabcom 2007**

*CBOSS transnational corporation will participate in Arabcom'2007, the 10<sup>th</sup> international Arabic exhibition and conference on telecommunications and IT that will take place April 11-12, 2007 in Dubai, UAE.*

Traditionally, this forum attracts representatives of state organizations and business from Middle East, Persian Gulf countries and other states. The conference will host ministers of telecommunications and IT, top managers of transnational IT corporations, telecom operators, ISPs, providers of IT and services and telecom experts. Last year about 500 attendees from 50 countries around the world participated in this exhibition and conference.

CBOSS Corporation regularly takes part in specialized exhibitions in Arabic countries. Placing a primary focus on the promotion of IT products in growing Asian markets, CBOSS is successfully competing in this region. From 2004 the company is an associated member of Russian-Arabic Business Council, which allows it to deal with mutually beneficial and promising international projects at the top national level. CBOSS products are successfully operated in Jordan, Saudi Arabia and Syria.

Arabcom'2007's agenda covers prospects of migration to NGN, broadband communications and IP telephony. CBOSS Corporation has announced a report "CBOSS solutions: reacting to telecom operators' requirements" that places a special focus on CBOSS recent achievements and state-of-the-art products.
